About Agility

Agility connects France to the rest of the world with air and ocean freight forwarding. Our freight network covers all major sea and airports in France. Pharma companies in France use our temperature-controlled expertise to transport medicines and drugs in transit. In-house resources give us the flexibility to comply rapidly with directives issued by pharmaceutical regulatory agencies. We specialize in the complex, industrial project logistics requirements of the oil and gas industry. Agility's longstanding commitment to developing countries is evident in our Marseille competency center that fosters trade to and from Maghreb, an emerging center of commerce in northwest Africa.

Services

- Freight Forwarding (air, ocean, road)
- Warehousing & Distribution
- Cross-border Trucking
- Customs Clearance
- Document Legalization
- Project Logistics

Customer Examples

Synchronized just-in-time delivery guarantees pharmaceutical market shares

A global pharma company specializing in generics needed a method for synchronizing product delivery to retailers in order to be the first on shelves after the patent expiry date. Just-in-time market delivery would be essential to gain the maximum market share, but the challenge was moving products from multiple production sites to several delivery points and timing their arrival with patent expiration dates that vary from country to country. Agility's product launch team monitors and maintains compliance according to patent expiry regulations, supports on-the-ground operational expertise to manage perfectly timed product launches, and provides the right equipment to comply with temperature requirements. The team also assesses customer requirements and provides customized reporting for every product launch. Agility's solutions improve the flow of goods so that this company is the first to have its generics available to customers, ahead of competition.

Cost-effective, compliant solution delivers pharma products from India to Europe

A global pharmaceutical company with a wide base of contract manufacturers (CMOs) in India had challenges sending finished products to Europe under cold chain-compliant conditions. The biggest problem? A lack of GDP-compliant facilities and equipment. The company also wanted to improve its container utilization rate and implement a reliable de-consolidation service model for end-market distribution in Europe. Utilizing our Pharmaceutical Competence Centre at Nhava Sheva Port in Mumbai, Agility manages and oversees the customer's supply of products from point-of-order to delivery. Shipments are collected and transported using LCL consolidated ocean freight service before being de-consolidated in Europe for final distribution through a temperature-controlled trucking network. The fully GDP-certified facility in India is also customs bonded in accordance with local tax legislation. Trained drivers and warehouse staff ensure reliable on-the-ground handling to maintain product integrity in terms of security, quality and temperature deviation. Agility's tracking tool provides the customer with full supply chain visibility at stock keeping unit (SKU) level.
