## About Agility

As one of the country's leading logistics providers, Agility offers access to reliable air freight cargo carriers, a customs-licensed free zone warehouse in Bangkok, and a strategic location that is less than 5 km from the airport and inland container depot in Ladkrabang. We manage cross-border road freight runs on a regular schedule to and from Singapore, Malaysia, Laos, Vietnam, China and Hong Kong. Our team provides contract logistics services and over 22,000 sqm of warehousing to industries such as technology, consumer goods, automotive and life sciences. Agility is certified as an Authorized Economic Operator by Thailand's Department of Customs.

## Services

- Freight forwarding (air, ocean, road)
- Warehousing & distribution
- Cross-border trucking
- Customs clearance
- Project logistics
- Chemical logistics
- Fairs & events logistics

## Customer Examples

### Agility Thailand Manages Huge Move in 90 Days

When long-time customer needed its new home and office air conditioning sets transported from Thailand to customers in the United States, Canada, Spain, Italy and France, it called on Agility. The cargo, weighing a combined 2.5 million kilograms, needed to be moved quickly – everything had to be delivered in a three-month period.

Charter Flight was the best solution for this case, Agility Thailand had to ensure that all the charter flights departed on time with no carton mishandling or cross-labeling to create delays. Agility Thailand worked tirelessly, utilizing our local and global strategic partnerships with various airlines to ensure that freighter aircrafts were available for the moves. A dedicated team in Thailand was set up for the project. Team members all worked closely with the cargo terminals at BKK to ensure that the cargo was organized, palletized and uplifted on schedule.

Less than ten days after receiving the request from customer, the first charter flight departed BKK with nearly 90,000 kilograms in chargeable weight onboard. Since that first flight, Agility has managed 26 more full-charter flights in just 90 days.

### Cross-border trucking service opens new routes in Southeast Asia

Agility pioneered road freight transportation across the ASEAN region by developing an integrated trucking network that links major cities, ports and airports to one another and to major destinations in China. Agility gives customers the flexibility of new routes, visibility, security, additional capacity and the option of combined land, air and sea transportation for raw materials and finished goods.

Regular road service connects Vietnam and Cambodia with Malaysia, Singapore, Laos, Myanmar and Thailand, offering customers up to 40% savings compared with airfreight. In addition to offering transportation within the region, Agility offers customers a truck-air solution when faced with air export capacity bottlenecks in Southeast Asia.

Agility's fleet is equipped with the latest GPS technology and in-container cameras connected to a command center in Bangkok.
